

INSIGHT

Streamlining processes and data with GIS

SUMMARY

Learn how viewing all your data as “spatial data” creates a common denominator. We can simplify the creation, organization, & consumption of complex or disparate data.

KEY TOPICS

- Spatial Data: Events & Telemetry
- Creation from the Field or Front-Lines
- Organization in the Back Office
- Consumption in your Enterprise

ABOUT THE SPEAKER

Tyler Remmert
Sr. Group Manager

Tyler is a senior group manager in the Rail Group at Bartlett & West. He is responsible for the daily operation of a team of GIS

professionals and understands accuracy and efficiency are critical in all projects.

Recording Duration: 40 minutes
